

US Army Corps  
of Engineers®

SAN FRANCISCO DISTRICT

# PUBLIC NOTICE

NUMBER: 26577S

DATE: 30 January 2002

RESPONSE REQUIRED BY: 1 March 2002

Regulatory Branch

333 Market Street

San Francisco, CA 94105-2197

PROJECT MANAGER: Bob Smith

Phone: (415) 977-8450/E-mail: rsmith@spd.usace.army.mil

**1. INTRODUCTION:** William J. Clark, P.O. Box 682, King City, California 93930, ((408) 385 - 3204) has applied for a Department of the Army permit to discharge fill associated with the ongoing mining of sand and gravel from San Lorenzo Creek at a site located approximately 5 miles northeast of King City, Monterey County, California. This application is being processed pursuant to the provisions of Section 404 of the Clean Water Act (33 U.S.C. 1344).

**2. PROJECT DESCRIPTION:** The applicant has had an ongoing sand and gravel mining operation on this site since 1963. The operation, as shown in the attached drawings, consists of skimming sand and gravel from within the channel of San Lorenzo Creek during the dry season. The applicant states that in-stream work is conducted on 40 acres, out of a total of 140 acres. The estimated maximum production is 50,000 to 80,000 cubic yards per year. Extracted material is stockpiled on the upland portion of the site. Maximum anticipated depth of mining is 15 feet.

**3. STATE APPROVALS:** Under Section 401 of the Clean Water Act (33 U.S.C. Section 1341), an applicant for a Corps permit must obtain a State water quality certification or waiver before a Corps permit may be issued. No Corps permit will be granted until the applicant obtains the required certification or waiver. A waiver shall be explicit, or it will be deemed to have occurred if the State fails or refuses to act on a valid request for certification within 60 days after the receipt of a valid request, unless the District Engineer determines a shorter or longer period is reasonable for the State to act.

**4. ENVIRONMENTAL REVIEW:** The Corps of Engineers will assess the environmental impacts of the action proposed in accordance with the requirements of the National Environmental Policy Act of 1969 (Public Law 91-190), and pursuant to Council on Environmental Quality's Regulations, 40 CFR 1500-1508, and Corps of Engineers' Regulations, 33 CFR 230 and 325, Appendix B. Unless otherwise stated, the Environmental Assessment will describe only the impacts (direct, indirect, and cumulative) resulting from activities within the jurisdiction of the Corps of Engineers. The documents used in the preparation of this Environmental Assessment will be on file in the Regulatory Branch, Corps of Engineers, 333 Market Street, San Francisco, California.

**5. EVALUATION OF ALTERNATIVES:**

Evaluation of this activity's impact on the public interest will also include application of the guidelines promulgated by the Administrator of the Environmental Protection Agency under Section 404(b)(1) of the Clean Water Act, 33 U.S.C. Section 1344(b).

**6. PUBLIC INTEREST EVALUATION:** The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts, of the proposed activity and its intended use on the public interest. Evaluation of the probable impacts that the proposed activity may have on the public interest requires a careful weighing of all those factors that become relevant in each particular case. The benefits that reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments. The decision whether to authorize a proposal, and if so the conditions under which it will

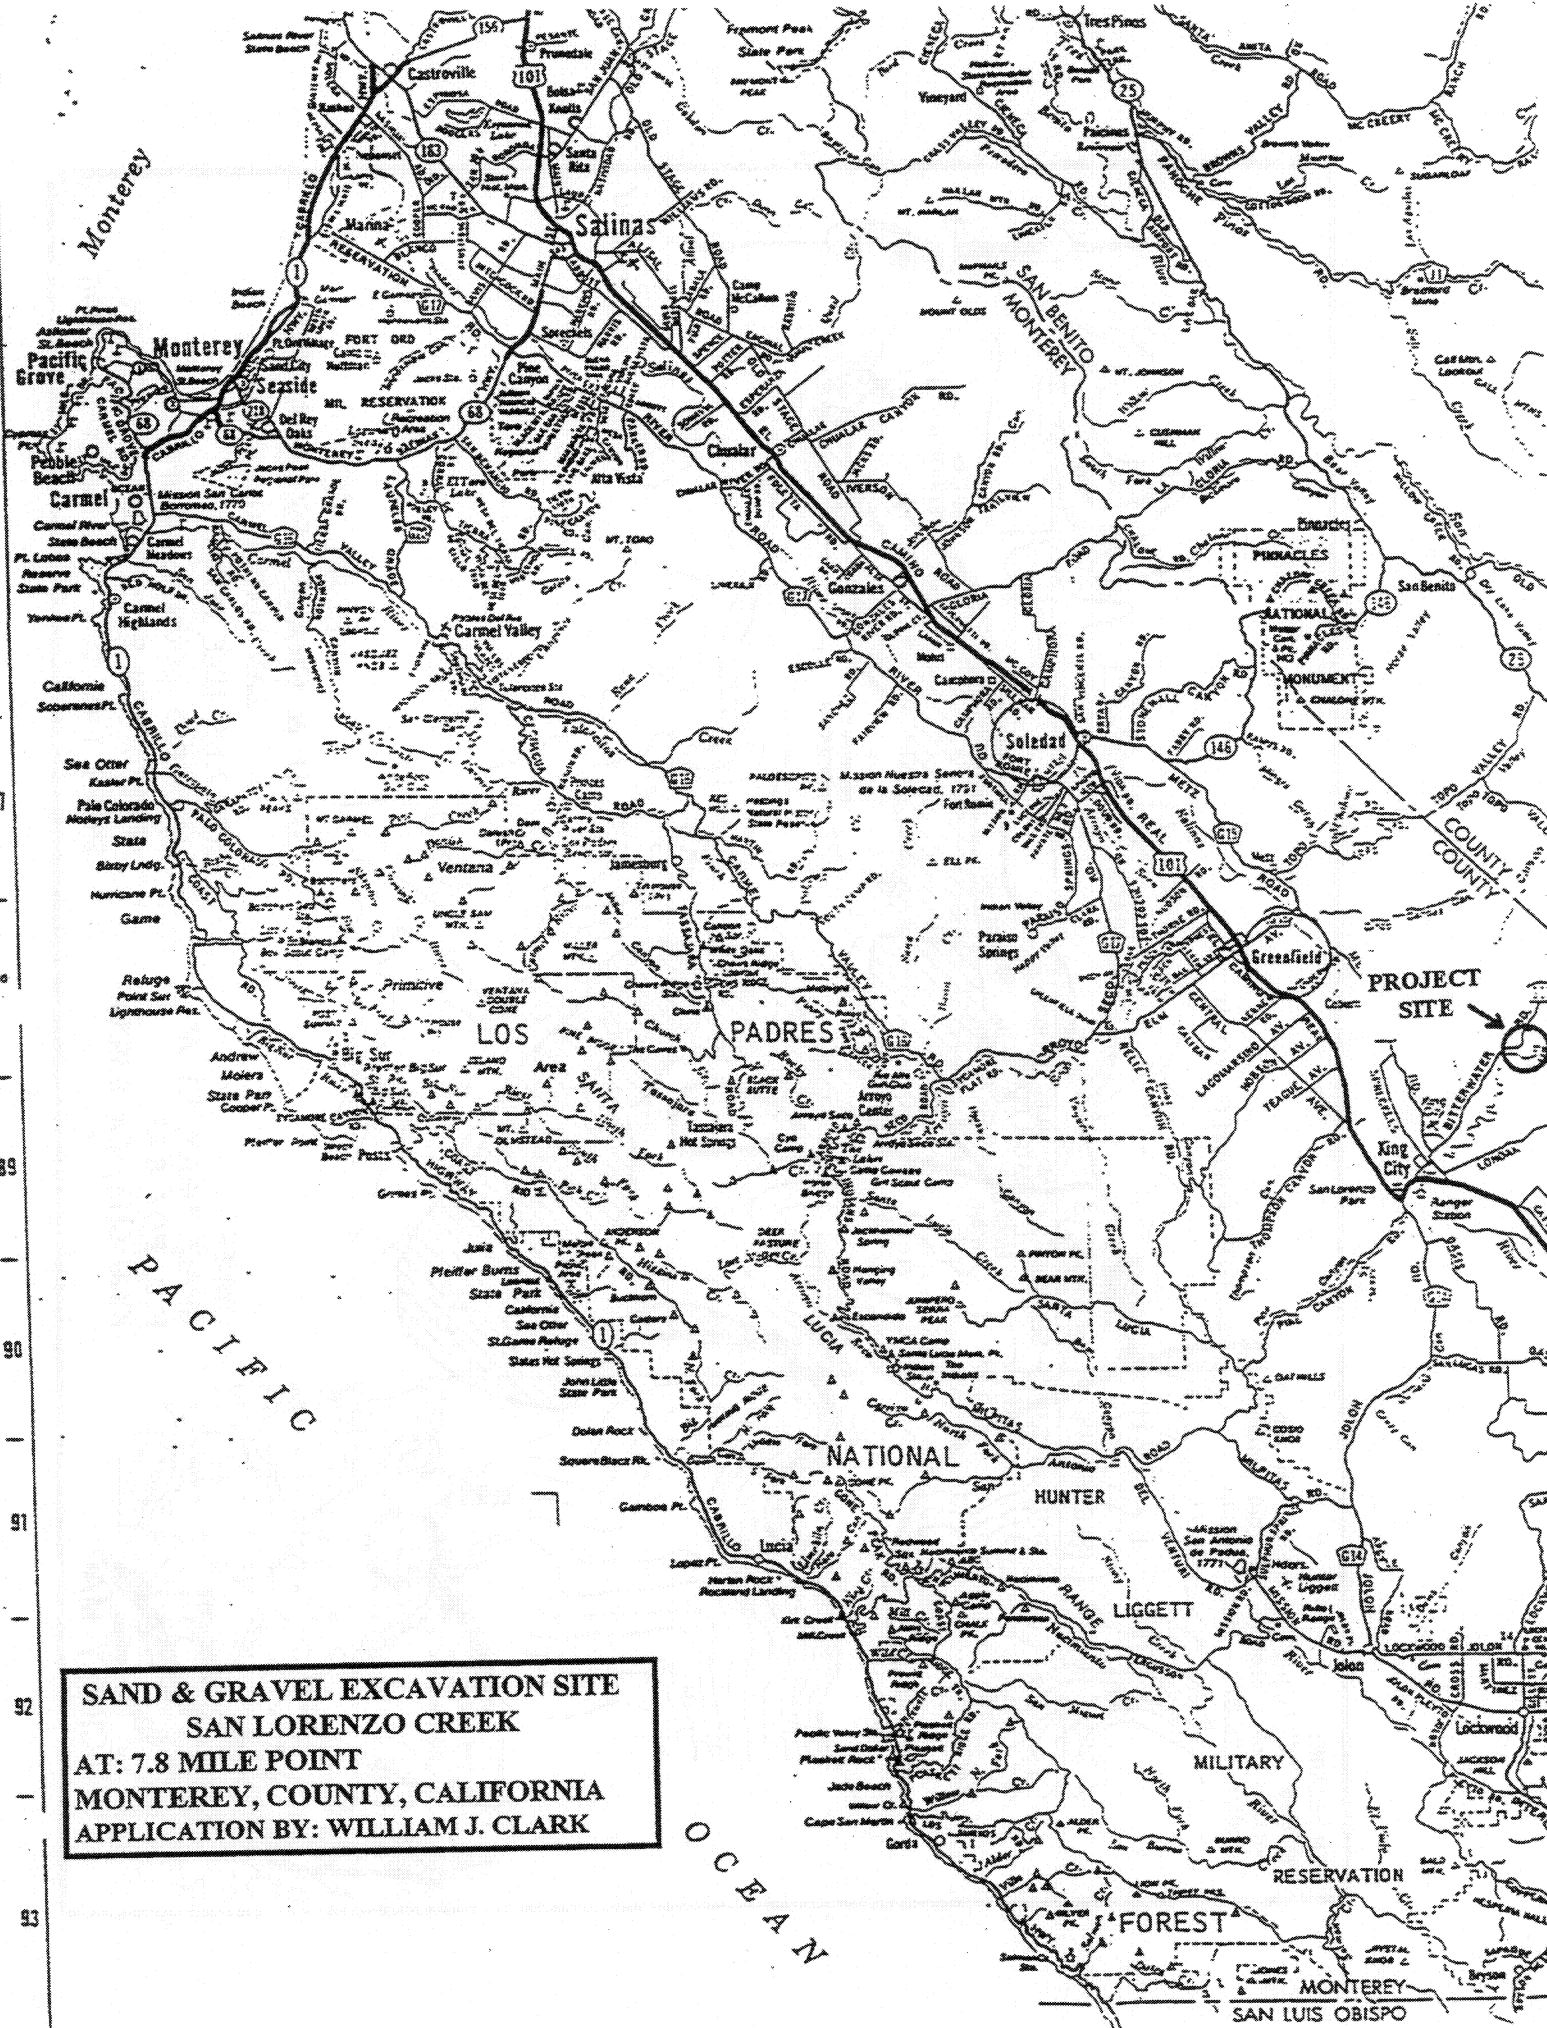

be allowed to occur, are therefore determined by the outcome of the general balancing process. That decision will reflect the national concern for both protection and utilization of important resources. All factors that may be relevant to the proposal must be considered including the cumulative effects thereof. Among those are conservation, economics, aesthetics, general environmental concerns, wetlands, cultural values, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership, and, in general, the needs and welfare of the people.

**7. CONSIDERATION OF COMMENTS:** The Corps of Engineers is soliciting comments from the public, Federal, State and local agencies and officials, Indian Tribes, and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an

Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

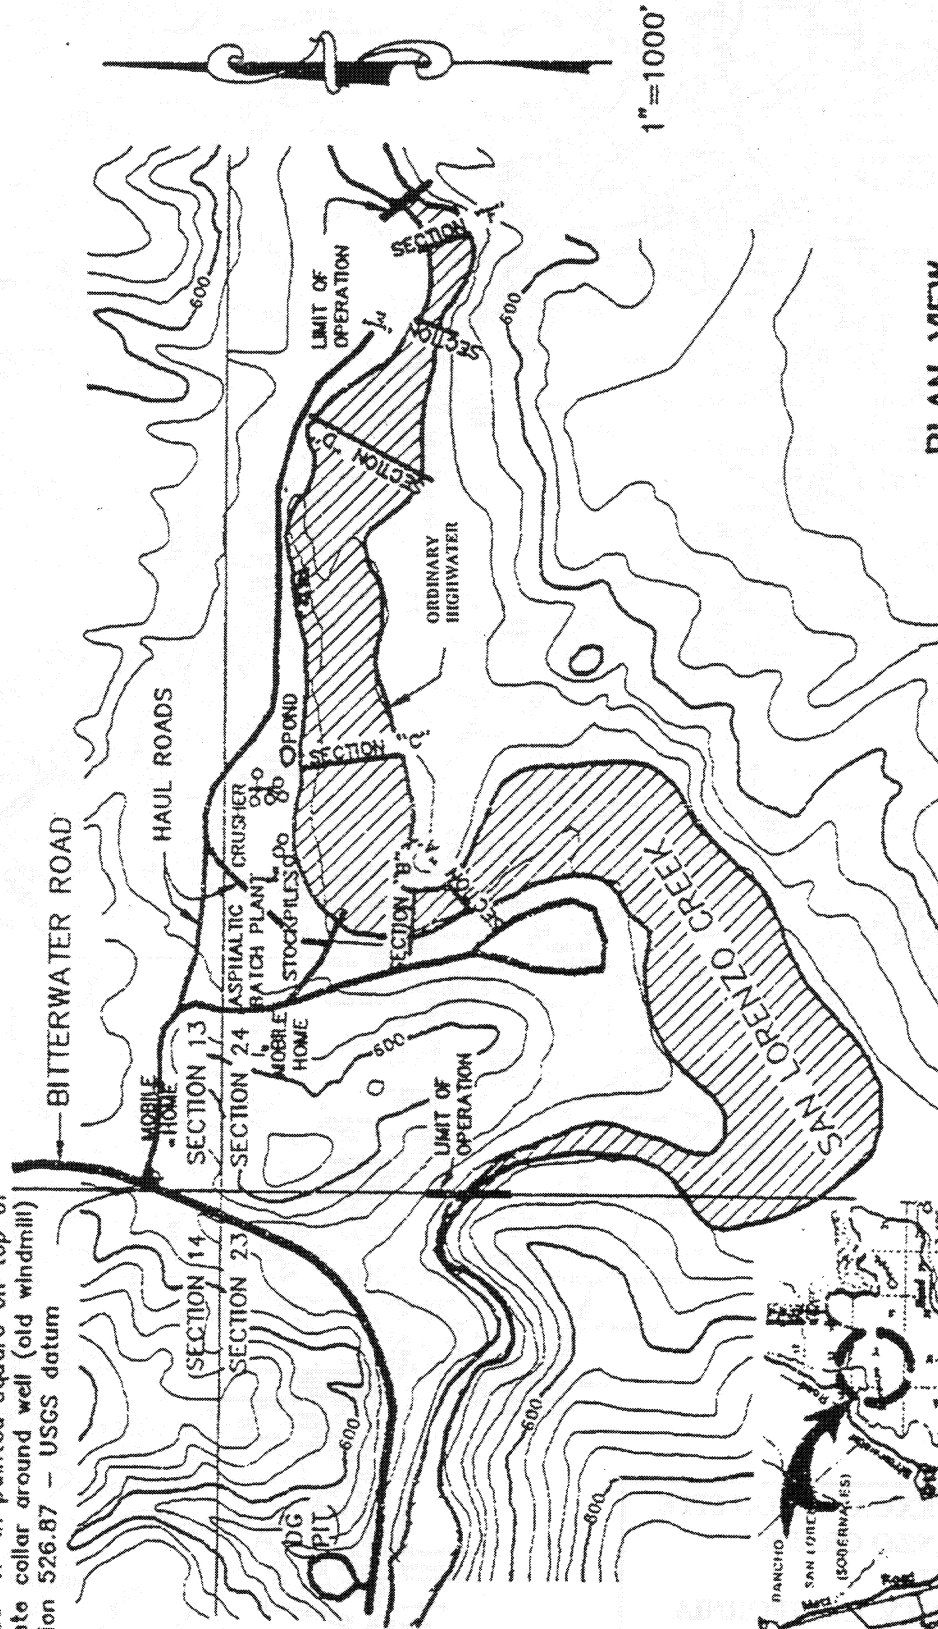

**8. SUBMISSION OF COMMENTS:** Interested parties may submit in writing any comments concerning this activity. Comments should include the applicant's name, the number, and the date of this notice and should be forwarded so as to reach this office within the comment period specified on page one of this notice. Comments should be sent to the Regulatory Branch. It is Corps policy to forward any such comments that include objections to the applicant for resolution or rebuttal. Any person may also request, in writing, within the comment period of this notice that a public hearing be held to consider this application. Requests for public hearings shall state, with particularity, the reasons for holding a public hearing. Additional details may be obtained by contacting the applicant whose address is indicated in the first paragraph of this notice, or by contacting Bob Smith of our office at telephone 415-977-8450 or E-mail: [rsmith@spd.usace.army.mil](mailto:rsmith@spd.usace.army.mil). Details on any changes of a minor nature that are made in the final permit action will be provided on request.
